

The design of the mobile app for KBTU students and professors. This is the whole version of the homepage. It is the update version of [wsp.kbtu.kz](http://wsp.kbtu.kz). Everyone can benefit from such kind of app in our university.

Home page of WSP KBTU

The icon for the mobile app  
The name of the project: WSP KBTU

This is the website of our University.  
It would be handle for students and professors also.  
Tagline: Kazakh-British Technical University  
(in my opinion it is better to use the brand in our case is the name  
)

The main function of the app is to navigate students and professors with appropriate data and making it more understandable and comfortable.

The login page of the app

On the second picture we can see that our upcoming events list can be scrolled

And it is also possible to press the button "More"

On the first picture it is the homepage without any changes

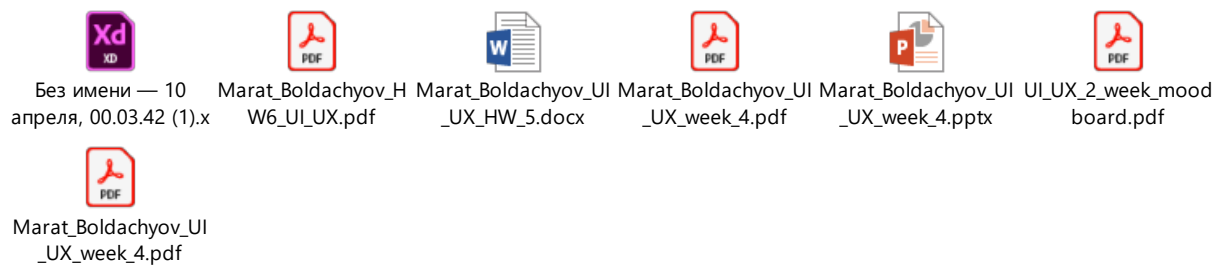

Here we can practically see, how our search space should work.

The login page of WSP KBTU

Прототип приложения выполнен с помощью Adobe XD.

Скрины каждого интерфейса размещены ниже. Также имеется сам файл .xd

Прототип полностью работающий, скрины всех связей для прокрутки всех интерфейсов также внизу.
